

CONCRETE LIFTING LOOP

DESCRIPTION & FEATURES

- **Purpose:** Facilitates lifting and handling of heavy concrete elements in construction.
- **Materials:** Made of durable high-strength steel wire materials.
- **Attachment:** Attached securely during casting for crane attachment.
- **Safety:** Meets and exceeds standards to prevent accidents during handling.
- **Load-bearing:** Engineered for heavy loads, ensuring safe transportation.
- **Certification:** Rigorously tested and certified for quality and compliance.
- **Contribution:** Enhances productivity and minimizes risks in construction.
- **Integrity:** Maintains structural stability during transportation and positioning.
- **Durability:** Withstands harsh construction site conditions.
- **Significance:** Crucial for safe and efficient construction practices.
- CE, Serial number, SWL & JB Lifting (JBL) Mark shown on the product.

CONCRETE LIFTING LOOP
