

GALVANIZED HEAVY DUTY THIMBLE

DESCRIPTION & FEATURES

- Standard EN 13411-1
- Grade 414
- Made from durable G80 alloy steel.
- Galvanization resists corrosion and rust in humid and harsh conditions.
- Thimbles reduce wear and abrasion on wire rope slings during loading.
- Galvanized accessories have a longer lifespan compared to non-galvanized ones.
- Improved safety by minimizing friction and potential damage to rope fibers.
- Enhanced reliability makes them suitable for lifting, rigging, and marine applications.

GALVANIZED HEAVY DUTY THIMBLE

TMBH

ItemCode(s)	Dimensions				Weight
	L	A	B	C
